

Points to Consider as the President Calls Congress To Approve an Attack on Syria

1. The U.S. has not been attacked or threatened with attack. Under the U.N. charter only the U.N. Security Council can order warfare and only to protect peace between nations.
- 2, The U.S. government has killed so many people and got it so wrong in places like Iraq, Guatemala, Vietnam, etc. How dare it pretend it's the high minded cop-of-the-world?
- 3.. Just a week ago "Foreign Policy" magazine printed CIA documents showing the U.S. supported Saddam Hussein in the '80's knowing full well he was using poison gas against Iran.
4. Though the White House printed a 4 page "Assessment" last week there was **no actual evidence in it**, just claims that it had evidence. It didn't even provide the audio of the supposed communications where chemical weapons were discussed.
5. The U.S. might get away with bombing Syria or it might bring on a much bigger war.
6. Syria needs a ceasefire, not more war.
7. **Keep all foreign forces and weapons out of Syria.**
