

There's More to It

We stand against Trump's assassinations and war threats. We also oppose the Soleimani model of making Iran a sectarian empire, using billions in Iranian assets for war while pursuing a ruthless model of development that displaces Iranian minorities. We call on the world to bring its attention to Ahvaz, an Arab majority town in Iran, which is a militarized zone that is also the most air-polluted city on earth.

- Get the U.S. troops home, especially out of Iraq
- Solidarity with Iranian workers, women and minorities struggling against the regime
- International solidarity, not religious warfare
- Iran, get out of Syria right now.
- End all proxy wars in the Middle East
- Stand with the people, not the regimes
